

Biopharma World
Marina Bay Sands, Singapore
1 – 2 November, 2010

The global biopharmaceutical industry is currently experiencing exponential growth with substantial opportunities to establish relationships and presence in emerging and existing markets. Major global drug companies are increasingly turning to biotechnology for new products to fuel growth.

This well-timed event is put together for attendees to get acquainted with new trends and developments in the biopharmaceutical industry as well as embrace cross border opportunities to explore and forge partnerships that encourage innovation and drive development.

This conference will address current issues, provide solutions, and highlight breakthrough scientific discovery and successful case studies on biopharmaceutical R&D, drug discovery, clinical research, manufacturing, investments, growth of emerging markets, outsourcing, partnerships and Asia as a pivot for biopharmaceutical activity.

The highly-interactive sessions will highlight some of the new innovations in biopharmaceutical drug development and manufacturing technologies and collaborative partnerships used to lower costs while maintaining quality of science and integrity of biopharmaceutical products.

The streams allocated in the conference agenda will be extended over two days:-

Stream One: Drug Development and Clinical Research

Stream Two: Bio Manufacturing and Distribution

Stream Three: Investments and Strategic Partnerships

Key benefits include:

- Advancing knowledge of new drug development technologies and benefiting from new partnerships in biopharmaceutical R&D
- Acquiring technical know how in the planning and design of clinical trials for improved cost efficiency and timely completion
- Unravelling innovative solutions in biosimilar manufacturing technologies
- Embracing new concepts of integrated manufacturing facilities to maximise production capacity and increased operational efficiency
- Identifying flexible distribution and supply chain solutions for regional and global expansion
- Gaining insights into regional trends in biopharmaceutical investments and its implications on the economy
- Exploring alternative financing options and venture capital funding for R&D and biopharmaceutical manufacturing
- Discovering new trends in contract research and manufacturing outsourcing
- Recognising best practice solutions to fully integrate partnerships and benefit from available resources
- Networking and benchmarking opportunities with Government authorities, international organisations, industry partners and leading names in the biopharmaceutical industry
